

The Flow Europe GmbH in Bretten is the European headquarters of the American Flow International Corporation, the world leader in the development and manufacture of industrial cutting technology based on ultrahigh-pressure and abrasive waterjet systems. Flow offers pioneering techniques for efficient and creative treatment of the most varying materials in almost all industrial branches. Every day, more than 800 employees take care of the concerns of our customers as well as landmark product innovations. We manage all our business in Europe, Middle East, Africa and India out of our European headquarters. We continue to grow and plan to add to our team the following positions:

Field Service Engineers (m/f) for Italy

Responsibilities:

- Independently install and start up waterjet cutting machines.
- Independently provide safety training as well as comprehensive user training for the customer.
- Maintain and repair ultrahigh-pressure pumps and XY tables.
- Troubleshooting of waterjet machines and components by telephone and on site.

Qualifications:

- Technician or graduate engineer (mechanical or electrical).
- Alternatively electrician or other qualified education closely related to technical services within the machine tool industry.
- At least three years of professional experience, ideally with machine tools assembly and start-up.
- Successful trainings in the area of motion control systems (e.g. CNC, PC).
- High capability in mechanical, electrical and hydraulic diagnostics.
- Familiar with use of Windows and the MS Office applications.
- Customer oriented decision making.
- Willingness to travel all over Europe, mainly however within own service region.
- Strong communication skills. Team spirit.
- Valid driving licence.
- Home office centrally located within the service region.

Are you looking for a challenging position at the world leader of a fascinating technology with outstanding potential for growth? Join the growth! We will promote your career through modern personnel development. Take advantage of the dynamics of an expanding European company and the innovative strength of an American corporation. An adequate remuneration goes without saying.
